

Northstar Sales Analysis

Client Presentation

Simulated retail analytics case study | Microsoft Excel

Project objective

Transform operational data into validated datasets, business analysis, management reporting, and a decision-oriented dashboard.

2,600 orders | 600 customers | 15 products | 211 return records

1. Executive Summary

Net Sales

1,646,725.45 TRY

Gross Profit

831,045.45 TRY

Gross Margin

50.47%

Cancellation Rate

5.31%

Returned Order Rate

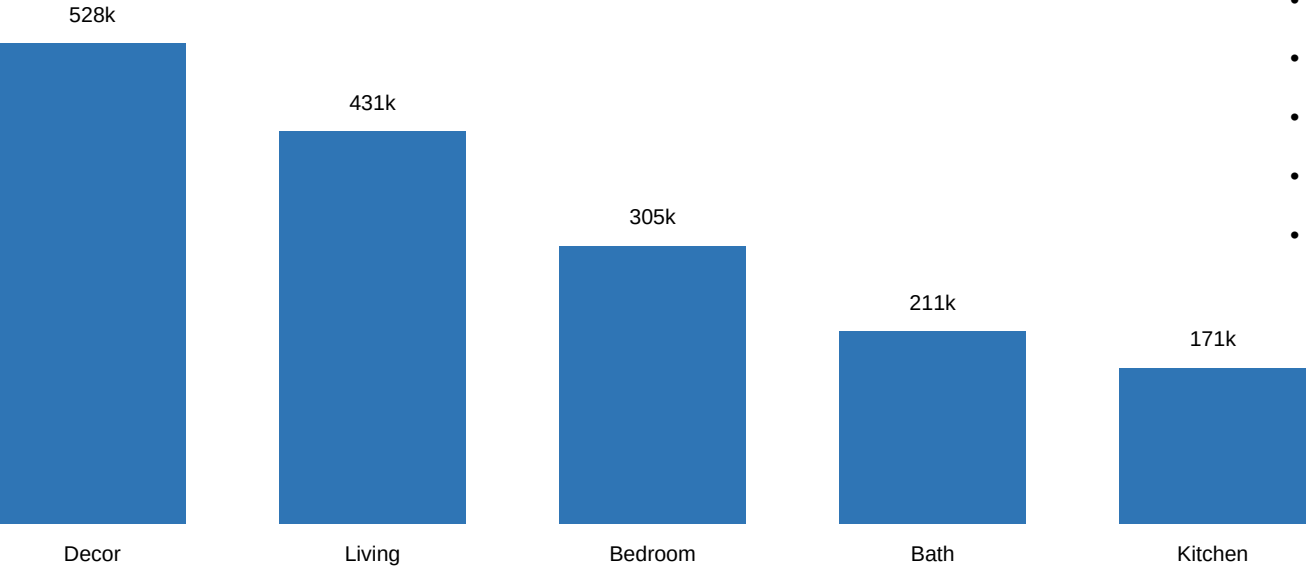

4.38%

Business context

- Sales and profitability were analyzed across monthly, category, product, city and customer-segment dimensions.
- Operational analysis covers cancellations and returns; data-quality exceptions are documented rather than fabricated.
- The dashboard and management report consolidate the analysis into decision-ready outputs.

Status	Orders	Rate
Completed	2,348	90.31%
Cancelled	138	5.31%
Returned	114	4.38%

Category Net Sales

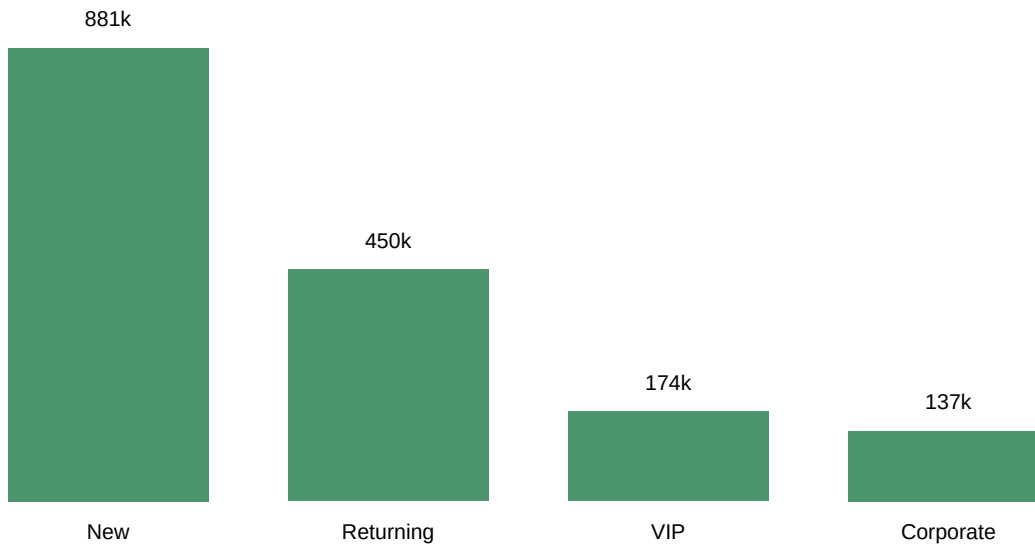

Selected product / margin facts

- DC001 generates 334,824 TRY in Gross Sales.
- LV001 has the highest Gross Margin at 51.39%.
- KT002 has the lowest Gross Margin at 49.21%.
- Decor Net Sales: 527,657.90 TRY.
- Living Net Sales: 431,244.10 TRY.

Monthly trend excludes O101501 because its source date is invalid.

Customer Segment Net Sales

Return reasons

- Wrong Product: 50 return records (50 units)
- Customer Change of Mind: 46 return records (46 units)
- Damaged: 43 return records (43 units)
- Late Delivery: 38 return records (38 units)
- Size/Spec Issue: 34 return records (34 units)

Operational indicators

- Cancellation Rate: 5.31%
- Returned Order Rate: 4.38%
- Highest identified city Net Sales: Gaziantep - 233,086.72 TRY
- Highest customer segment Net Sales: New - 881,017.88 TRY

4. Data Quality & Exceptions

Documented controls and limitations

Key documented exceptions

Issue	Record / Scope	Portfolio treatment
ISS-012	9 Customer IDs	Present in Customers but not used by Orders; no synthetic orders added.
ISS-013	O101101	Missing Unit Price; no imputation.
ISS-014	O101501	Invalid Order Date; preserved and excluded from monthly grouping.
ISS-026	O999999	Return Order ID not found in Orders; return retained as an exception.
O100321	Missing Customer_ID	City and Customer Segment shown as Unknown.

Professional handling principle

No values were fabricated to make the analysis appear complete. Unverified source issues remain documented.

This is a simulated client project; all portfolio materials are derived from the supplied working dataset.

Recommended follow-up actions

- Investigate Wrong Product and Damaged returns through pick, pack and shipping controls.
- Review the 5.31% cancellation rate by operational cause once a reliable cancellation-reason field is available.
- Resolve the documented customer/order and return/order reconciliation exceptions before production reporting.
- Validate the missing Unit Price and invalid Order Date with the source owner before using the affected records for financial reporting.

Delivered portfolio artifacts

- Cleaned data tables
- Issue Log and Data Quality Check
- Monthly / Category / Product / City / Segment analyses
- Cancellation and Return analyses
- Management Summary and Dashboard
- Client Acceptance Test
- 5-minute Client Presentation

Northstar

End-to-end Excel analytics case study

Clean data -> analysis -> reporting

-> dashboard -> acceptance test
